for you. for life.

Why Saba ACE® ?

BURN BODY FAT & WEIGHT MANAGEMENT

Saba ACE® is a cutting-edge weight loss and thermogenic fat burner for men and women. Each capsule contains an effective dose of the most powerful fat-burning ingredients available. Its synergistic formula helps to burn fat, increase energy, preserve lean muscle, suppress appetite, boost the metabolism, and improve mood.†

ENERGY BOOSTER & APPETITE SUPPRESSANT

Conquer your day and crush your workouts with jitter-free energy and keep food cravings in check.†

CLINICALLY PROVEN GREENSELECT PHYTOSOME® TECHNOLOGY

GreenSelect Phytosome® consists of green tea polyphenols that are bound to a phospholipid (i.e., a lipid, or fat, containing a phosphate group). It improves the absorption of polyphenol compounds such as EGCG into your body by making it easier for them to pass through cell membranes to enhanced bioavailability and efficacy to deliver better and faster results.†

CLINICALLY PROVEN AFRICAN MANGO (IRVINGIA GABONENSIS)

Irvingia Gabonensis targets multiple metabolic pathways in the body associated with satiety, appetite control, metabolism, fat burning, and blood sugar balance.†

BEST NOOTROPIC STACK FOR ENERGY, FOCUS, MEMORY & MORE

Saba ACE® contains the perfect combination of Dynamine™, Caffeine and L-Theanine to deliver an amazing energy and nootropic feeling you have to try it to believe it, which makes Saba ACE one of the best energy and nootropic products on the market.†

KEY BENEFITS

One Of The Top Selling Weight Loss Supplements

- Fat Loss†
- Weight Loss†
- Appetite Control†
- Energy†
- Nootropics†
- Relieves Fatigue†
- Improves Mood†
- Improves Focus†

INGREDIENTS

Vitamin B6 & B12:

The B complex of vitamins plays an important role in healthy bodyweight, in particular they have been shown to be fundamental in helping you achieve a normal, energy yielding metabolism.

Optimal levels of Vitamin B are also key to reducing tiredness and fatigue, the goal of anyone looking to stay fit and healthy.

Chromium Picolinate:

Chromium is an essential trace mineral, which has been shown to support normal macronutrient metabolism, one of the main objectives of a healthy diet.

Recent evidence also demonstrates that chromium can contribute to the maintenance of normal blood glucose levels.

INGREDIENTS (CONTD.)

GreenSelect® Phytosome®:

Greenselect® Phytosome® is a green tea extract devoid of caffeine and formulated with lectin to improve the absorption of catechins. Each serving of Saba ACE® contains 150 mg of the clinically studied GreenSelect® Phytosome®. Oral consumption of 150 mg twice a day, combined with a reduced-calorie diet resulted in an average of over 30 lbs. weight loss in 90 days in a clinical study.†

Clinical Studies on Greenselect® Phytosome®

One hundred overweight patients were treated with 150 mg of Greenselect® Phytosome® twice daily (300 mg/day). All patients (treated and placebo) were put on a low calorie diet (1250-1350 Kcal for women and 1650-1750 Kcal for men) distributed in 4 meals per day. Parameters such as body weight, body mass index, waistline, total cholesterol, basal glycemia and total triglycerides were measured at the beginning, after 45 days, and after 90 days (end of the study). The average weight loss was 6 kg in the diet only group and 14 kg in the treated group. Results showed that Greenselect® Phytosome® provides clinically demonstrated support in weight management.

African Mango (Irvingia Gabonensis):

Irvingia Gabonensis targets multiple metabolic pathways in the body associated with satiety, appetite control, metabolism, fat burning, and blood sugar balance. In one clinical study, Irvingia Gabonensis was administered at 150 mg twice daily before meals for 10 weeks to overweight and/or obese volunteers. The study yielded significant improvements in body weight, body fat, and waist circumference as well as plasma total cholesterol, LDL cholesterol, blood glucose.†

Clinical Studies on Irvingia Gabonensis

The result of a 10-week randomized, double-blind, placebo-controlled study on 72 obese or overweight participants revealed the following results: The test group lost an average of 26 lbs. (11.8 kgs) over the 10-week period, and body fat decreased by an average of 20.06%, and waistline decreased by an average of 8.6 inches.

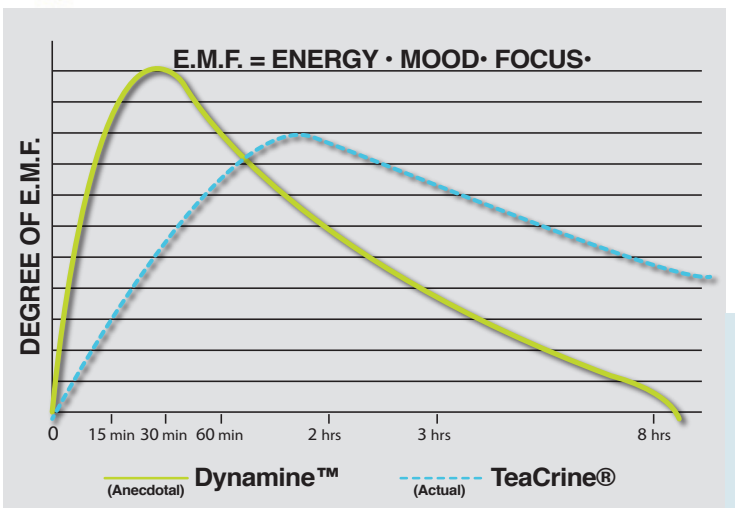

African mango seed extract has been found to have significant effects on lowering cholesterol, specifically LDL or low-density lipoproteins and triglycerides (bad cholesterol), increasing HDL (good) cholesterol, and helping people lose weight.†

INGREDIENTS (CONTD.)

DYNAMINE™

Dynamine™ is a natural stimulant that is used to increase energy and alertness. Dynamine™ is a close relative of the already highly sought after product, TeaCrine® – only Dynamine™ is said to pack a harder punch in a shorter period of time and is active longer than other stimulant on the market. Dynamine™ enhances oxygen uptake and increases energy output, which helps burn more calories and fat. If you're able to burn more fat and calories throughout the entire day, you can achieve added benefits, including weight and fat loss, and a leaner physique.

Evodiamine:

Evodiamine comes from the plant called Evodiae Fructus. It's a stimulant that increases your resting core temperature and body heat. Many believe that this is the reason more calories and fat are burned for energy when taking evodiamine.†

Garcinia Cambogia:

Garcinia Cambogia is a tropical fruit that is often used to improve the culinary experience of food, leaving you feeling more satisfied. The skin of the fruit is naturally high in a substance called hydroxycitric acid. This active compound keeps hunger in check and prevents overeating, emotional eating, snacking between meals and unhealthy sugary cravings.†

L-THEANINE:

The relaxing amino acid found in tea, theanine promotes relaxation without sedation. It helps you stay calm without making you tired or drowsy. Theanine reduces stress, improves attention, and helps take off the 'edge' of many stimulants.†

BIOPERINE®:

BioPerine® is a patented form of black pepper fruit extract, which promotes the absorption, and utilization of all other ingredients found in Saba Ace to increase their bioavailability. Piperine also reduces LDL cholesterol and plasma lipids while elevating HDL cholesterol and thyroid hormones. †

Natural Caffeine

Anhydrous:

Caffeine is a methylxanthine found in a variety of plants, especially tea leaves and coffee beans. Caffeine is one of the most well-researched stimulants, with evidence showing it can enhance athletic performance & endurance.†

APPLE CIDER VINEGAR:

Apple cider vinegar cleanses your body and wards off unhealthy bacteria. Apple cider vinegar has shown great promise in improving insulin sensitivity and helping lower blood sugar responses after meals. Studies suggest that vinegar can increase feelings of fullness and help people eat fewer calories, which leads to weight loss.†
