# saba ACE<sup>G2</sup>

Weight Management and Energy

**ENERGY + FOCUS<sup>†</sup>**  
**ENDURANCE + REACTION<sup>†</sup>**  
**APPETITE CONTROL + FAT BURNING<sup>†</sup>**

## KEY INGREDIENTS:

Our exclusive Saba ACE G2™ is loaded with the following premium ingredients:

### APPETITE CONTROL BLEND:

- Chromium:** Chromium is an essential trace element that can help fight hunger and cravings. It helps regulate the amount of sugar in the blood, thus helping you avoid craving for carbohydrates.<sup>†</sup>
- Asian Ginseng:** Ginger provides the body with key nutrients to help limit cravings and helps flush the colon and digestive system of waste and toxins.<sup>†</sup>

### METABOLISM BLEND:

- Garcinia Combogia (60% HCG):** Garcinia Combogia helps curb appetite and burn excess fat. It works by boosting levels of the serum serotonin, which is a neurotransmitter used for appetite control.<sup>†</sup>
- Citrus Aurantium:** Bitter Orange extract is said to possess thermogenesis properties, which increase in resting metabolic rate and energy expenditure. Increasing resting metabolic rate increases the amount of calories burned at rest. Citrus aurantium may also boost energy expended during exercise.<sup>†</sup>
- Cayenne Pepper:** Cayenne pepper contains the powerful compound capsaicin. Capsaicin is known to increase thermogenesis within the body leading to a faster and more efficient metabolism. Cayenne pepper also helps the body eliminate waste and toxins faster.<sup>†</sup>
- Vitamin D:** Research says that vitamin D plays a crucial role in weight loss by helping fat cells become more metabolically active. Adding vitamin D to a reduced-calorie diet will lead to better weight loss.<sup>†</sup>
- Phase 2® (Carbohydrate Blocker):** Phase 2® is an extract of white kidney bean that binds and neutralizes the alpha-amylase enzyme, preventing the breakdown of carbohydrates into glucose.<sup>†</sup>
- Vanadium:** Helps to maintain a healthy blood sugar balance.<sup>†</sup>
- Green tea leaf extract (70% EGCG):** Green tea extract rich in EGCG has been linked to increasing calorie and fat metabolism, promoting weight loss. The caffeine content in green tea increases resting energy expenditure (REE) and cellular thermogenesis leading to smaller waist circumference, lower BMI (Body Mass Index), and promote weight loss.<sup>†</sup>
- Green Coffee Bean:** Some researchers suggest green coffee beans promote weight loss because they are rich in phytochemical chlorogenic acid.<sup>†</sup>
- Evodiamine:** Evodiamine acts as a thermogenic and has the unique ability to increase your overall resting core temperature. Many believe that this is the reason more calories and fat are burned for energy when taking evodiamine.<sup>†</sup>
- Yohimbe Bark:** Yohimbe enhances athletic performance and weight management.<sup>†</sup>

### APPETITE CONTROL BLEND:

- Theobromine:** Theobromine is a bitter alkaloid that resembles caffeine in its chemical structure and partly in the way it behaves in the body. It allows you to enjoy all the energy boosting and positive mental aspects of eating chocolate with none of the high calories and high fat drawbacks.<sup>†</sup>
  - L-Tyrosine:** L-Tyrosine is an amino acid that the body is able to synthesize from phenylalanine. It is an important nutritional ingredient and factor for biosynthesis of the brain neurotransmitters epinephrine, norepinephrine, and dopamine (key to positive mood). By promoting the production of these "feel-good" chemicals in the brain, tyrosine is very beneficial to improving mood and disposition.<sup>†</sup>
- Tyrosine also produces one of the major hormones, thyroxine, which plays an important role in controlling metabolic rate and other health benefits.<sup>†</sup>

### ENERGY BLEND:

- Caffeine Anhydrous:** Caffeine anhydrous is the pure, waterless form of your everyday caffeine. With all contaminants removed, caffeine anhydrous provides you with a large, rapid, steady boost in energy to sustain your activities throughout the day and provide you with an increase in mental clarity. Caffeine anhydrous also boosts metabolism.<sup>†</sup>
- Beta-alanine:** CarnoSyn is the most popular, highest-quality beta-alanine on the market, found in the most popular pre-workouts and ergogenic supplements. Beta-alanine is a non-essential amino acid used to improve improving athletic performance and exercise capacity, build lean muscle mass, and improve physical functioning in the elderly. Many experience a boost in alertness and energy from beta-alanine.<sup>†</sup>
- CoEnzyme Q10:** CoEnzyme Q10 is a natural coenzyme found in the body that plays an essential role in the production of energy and the breakdown of food byproducts. Studies have shown that oral supplementation of CoEnzyme Q10 increases the breakdown of food (preventing it from being stored as fat) and provides a healthy boost of energy.<sup>†</sup>
- Vitamin B3 (as Niacin):** Niacin is another important B vitamin integral to optimal health and body performance. It regulates metabolism, which controls the level of energy in the body and how efficiently our body uses calories.<sup>†</sup>

### FOCUS BLEND:

- Huperzine A:** Research suggests that taking Huperzine A improves memory, mental function, and behavior.<sup>†</sup>
- BioPerine®:** BioPerine, a patented product that increases the bioavailability of Saba ACE G2 so it can deliver their full benefits inside the body.<sup>†</sup>
- Vitamin B's and Folic Acid:** Consuming B vitamins, adequate amount of folic acid and B12 daily may help maintain clarity of thought and supports short and long-term memory.<sup>†</sup>
- Saffron Root Extract:** Saffron is a powerful herb traditional used to support cheerfulness, positive mood, harmony and balance.<sup>†</sup>

### SYNERGISTIC BLEND:

- BioPerine®:** BioPerine, a patented product that increases the bioavailability of Saba ACE G2 so it can deliver their full benefits inside the body.<sup>†</sup>

## FREQUENTLY ASKED QUESTIONS ABOUT SABA ACE-G2™

### Q. How does Saba ACE-G2 work?

**A.** Saba ACE-G2™ is an effective energy & weight management supplement because its ingredients cover all aspects of weight loss: appetite suppressant; metabolism; energy; focus; and mood enhancement.<sup>†</sup>

### Q. Should I exercise to see the best results?

**A.** Saba ACE-G2 is not a "miracle pill". Saba ACE-G2 is designed to amplify weight loss and fat loss benefits when combined with a regular exercise routine and healthy diet.

### Q. What is the caffeine content?

**A.** Saba ACE-G2 contains approximately 160 mg of caffeine, which is equivalent to one to two cups of coffee based on the brewed strength.

### Q. How should I take this product?

**A.** Before you take any dietary supplement, we recommend that you consult your health care

provider. We recommend that you thoroughly research each ingredient in this product because our best customers are those with a comprehensive understanding of all ingredients in Saba ACE-G2™. You should take Saba ACE-G2™ as a dietary supplement. Take 1 capsule in the morning and 1 capsule in the afternoon, 15-20 minutes after eating meal. Drink at least 8 to 10 glasses of water daily. Do not exceed the recommended dose. Please follow instructions on the label carefully. Improper use of this product will not improve results and is not advised. Keep out of the reach of children.

### Q. What if I am unhappy with the product?

**A.** We stand by our premium quality products, and your satisfaction is 100% guaranteed. See our website for details on our return policy.
